**NEGATIVE ELECTRODE FOR NONAQUEOUS ELECTROLYTE SECONDARY

Examiner: S.Yanchuk      S.N.:10/522791      Art Unit: 4131      Sept. 25, 2008

**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 2-6, drawn to apparatus I being the anode surface layer.

Group II, claim(s) 7-8, drawn to apparatus II being micro-void contacts.

Group III, claim(s) 9-20, drawn to apparatus III being the active material particles.

Group IV, claim(s) 21-25, drawn to process I.

Group V, claim(s) 26, drawn to combination I.

2. The inventions listed as Groups I - V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the inventive concept of the unity of invention is found in prior art. Kawakami et al. (US Patent 6,051,340) teaches an anode comprising a metal layer, an active material, and particles being

capable of being alloyed with lithium [Col 10 Ln 10]. This anode is used in a battery that comprises two current collecting surfaces (anode and cathode) and an electrolyte or electrolyte solution [Abstract].

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
